

## DENON AVS-3

### 3 in/1 out HDMI Switcher

The Denon HDMI Switcher allows up to three 8K devices to connect to select Denon 8K AV receivers. Comes compact sized for easy placement and includes a handy remote control. Supports automatic power-on and input switching by HDMI CEC for ease of use. The AVS-3 has detachable wall-mount brackets for custom integration and IR repeater capability if both the AVR and the Switcher are in a rack system or behind a cabinet blocking IR reception. The unique "AVR Control" feature allows changing the HDMI Switcher's inputs using the AVR's IR remote.

#### HIGHLIGHTS

Connect Up to Three 8K Compatible Source Devices

Compact Size and Elegant Look

Total Ease-of-Use

Custom-Install Friendly

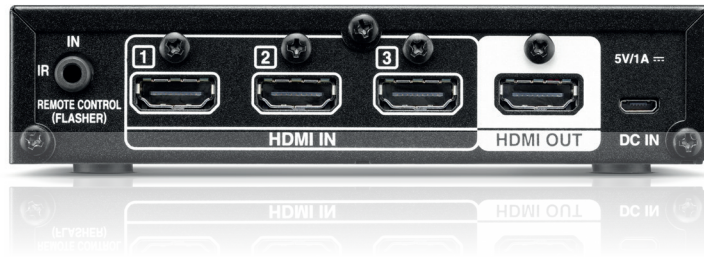

#### YOUR BENEFITS

Prepare for the growing number of such devices by upgrading your beloved AV receiver with the Denon AVS-3. It allows up to three 8K devices to be connected to Denon 8K AV receivers, tripling the input capability.

No bigger than a Blu-ray case in width and depth, the AVS-3 can fit just about anywhere. It also features a premium look thanks to a brushed black Aluminum front plate..

Use HDMI-CEC to power on and switch inputs automatically on both the HDMI Switcher and the AV receiver. The unique "AVR Control" feature allows to switch the AVS-3's inputs using the AVR's IR remote.

A wall-mount bracket is included to allow mounting the HDMI Switcher on a wall. It also features wired IR remote repeater connectivity in case the AVS-3 and AVR are in a rack system or behind a cabinet blocking IR reception..

Technical Information		What's in the box
